hydro flame™
UNIVERSAL
DC Ignition Control Kit

Revision C, 9/18

KIT INCLUDES:

QTY	COMPONENTS
1	New DSI Control Board
2	Standoff
1	Edge Adapter

REMOVAL PROCEDURE-

1. Remove old DSI board by removing (2) two screws.

INSTALLATION PROCEDURE-

1. Install new board by locating in same configuration as old board.
2. Use standoffs provided if old board had legs on the board, place standoffs between board and bracket.
3. Secure DSI board to bracket with existing (2) two screws.
4. If the old board being replaced is a 05-15 series, new holes will have to be drilled in DSI bracket to mount new board.

- **New DSI board is a direct replacement for all 12 DC older systems. Use with edge adapter if applicable. No wiring changes are required.**
- **Direct replacement with current systems.**
