

SOURCES FOR DIFFICULT PARTS TO OBTAIN

MISC. BULLETIN
MB1 / 3A
MARCH 1993

In the life cycle of any product, it is inevitable the service parts become difficult or impossible to obtain. Discontinued products and vendor availability are just two, among many, reasons for this to happen.

So that you may better serve those customers who need rare parts, Dometic has researched several product categories to assist you in locating rare service parts. Attached is a listing of sources who may stock the parts you need.
