

REPLACEMENT OF ELECTRONIC CONTROLS IN RM2612 & RM2812 REFRIGERATORS

REFRIGERATOR
BULLETIN R71/4A
September 1994

The controls for Models RM2612 and RM2812 are unique to these models. They are NOT interchangeable with any other model nor are they interchangeable within the "12 Series" refrigerator models.

There are three separate and distinct versions of controls as described below. The various components **MUST NOT** be mixed.

If you suspect mismatched components, check the individual part numbers. Compare the part numbers on parts to the ones listed below to ensure a proper match.

The RM2812 refrigerator should have only Version III controls as original equipment. The RM2612 with serial number 41900000 or higher will have Version III controls as original equipment.

! CAUTION

MIXING OF ELECTRICAL COMPONENTS FROM OTHER MODEL REFRIGERATORS AND WITHIN THE "12 SERIES" MODEL REFRIGERATORS MAY CAUSE IMPROPER OPERATION (i.e. NO COOLING, OVER-COOLING) AND DAMAGE TO POWER MODULE, DISPLAY PANEL OR BOTH.

VERSION I

Display Panel	2932189.01
Power Module	2931842.02 or 2931842.03
Thermistor	2931863035

VERSION II

Display Panel	2932189.02
* Power Module	2931842.02XX
Thermistor	2931863035

* Power Module has red plugs and a Red Dot on the cover. See FIG. 1

VERSION III

Display Panel	2932189.03
* Power Module	2931842.04
Thermistor	2931863035
* See FIG. 2.	

When Replacement Electronic Controls on RM2612 Model Refrigerators are required, use 3108701.610 Electronic Control Kit. It contains a matching set of controls as in either Version II or Version III. Individual parts can be ordered for all RM2812 Model Refrigerators and any RM2612 Model Refrigerators over serial number 41900000. These refrigerators were produced with Version III controls as original equipment.
