

INSTALLATION INSTRUCTIONS FOR HINGE REPAIR KIT PART NO. 3108703.640

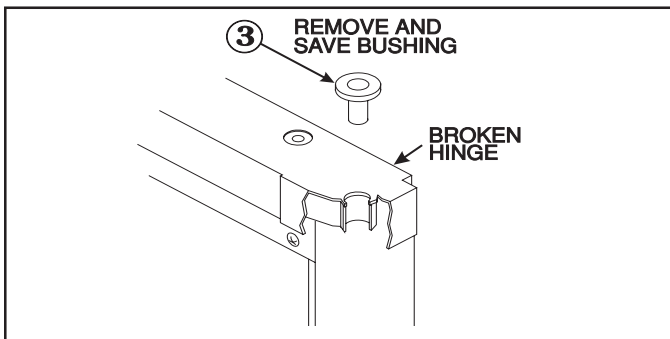

COMPONENTS PROVIDED WITH THIS KIT:

(1)	3106847.001	Hinge Plate, Top
(1)	3106847.019	Hinge Plate, Bottom
(2)	308171.001	Pop Rivet
(1)	2931287011	Hinge Pin
(1)	3106912.029	Installation Instructions
(2)	2931171017	Bushing

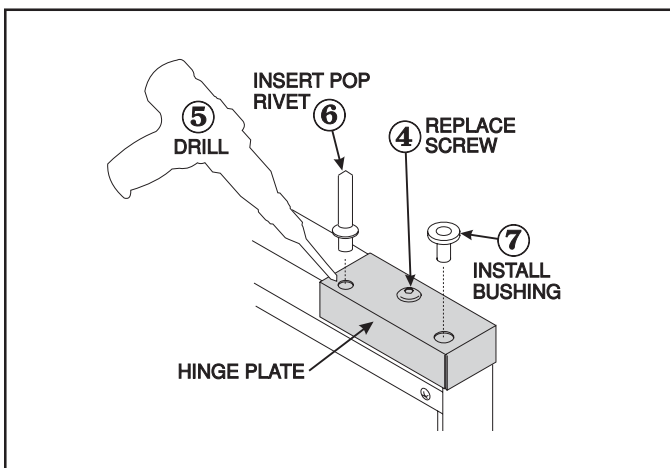

IMPORTANT!: When installing this Hinge Kit in conjunction with a Door Gasket Replacement Kit, install the Gasket Kit prior to installing this Hinge Kit.

INSTALLATION INSTRUCTIONS

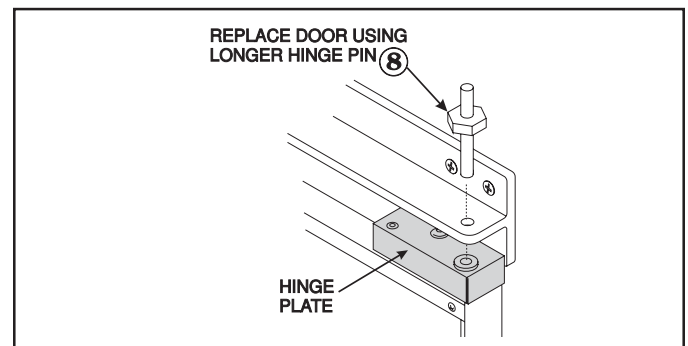

1. Remove the refrigerator door(s). (Refer to Owner's Manual for detailed instructions on this procedure.)
2. Select the hinge plate required to fit the broken hinge area on the door.
3. Remove the bushing from the broken piece and save for use later. Refer to illustration below.

4. Remove the screw from the door frame. Locate the hinge plate in the correct position and replace the screw.
5. Drill a #30 (.128") hole in the door frame using the hinge plate as a template.

6. Install pop rivet provided into the drilled hole.
7. Install the bushing into the hole in the hinge plate.
8. Replace the door onto the refrigerator using the longer hinge pin provided with this Kit.

9. This completes the Hinge Kit installation.

This Kit is applicable for the following refrigerator models:

RM2310
RM2410
RM2510
RM2607
RM2611
RM2612
RM2807
RM2811
RM2812
RM3607
RM3807
