FIG. 1

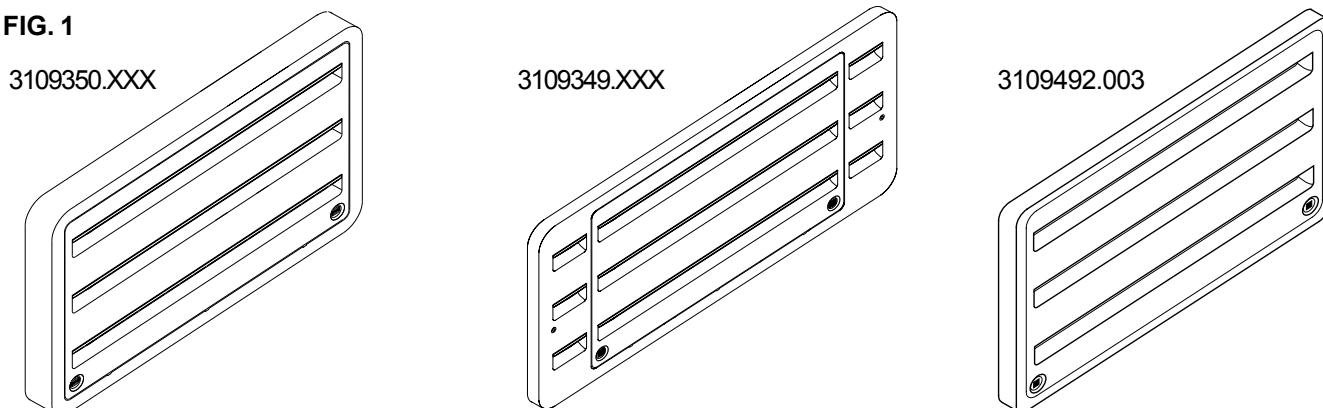

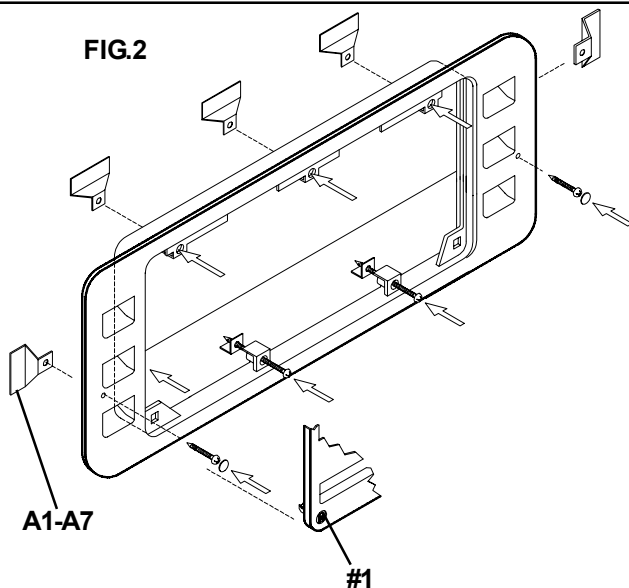

FIG. 2

#1 Latch
Customer Option

See Page 2
See Page 2 (A1-A7)

1. Install frame as shown in Figure 2.
2. Opening size is as shown in Figure 3.
3. Several styles of brackets are available for laminated walls, depending upon the sidewall thickness. (See drawings on page 2) The best method for **conventional sidewall construction** is to place the screws through frame of the vent and into the frame structure of the opening.
4. Use #10 screws; length required is determined by the thickness of vehicle wall.
5. After sealant is applied, position the frame into the cutout area.
6. Tighten screws until firm. **DO NOT overtighten or distortion will take place.**
7. Insert door and lock with quarter-turn fasteners on each side.

FIG. 3

Cutout Requirements for New Injection Molded Vent

VENT CUTOUT

	H	W
