Subject: Re: Spare parts lists availability

Peo,

Please reply to all when you return this email as I will be out tomorrow morning and I want to make sure that this information gets to the appropriate people as soon as possible.

On these below part numbers, I am being told that there is a number missing that these are typically ten digit part numbers and that there is one digit missing from each of the below. Can you please let us know what that is and why these are different? I appreciate all of your help.

Thank you and best regards

Chris Holland

Subject: Re: Spare parts lists availability

Dear John,

I have from the bill of material list made the below listing of part numbers.

Hopefully there are no big mistakes. I have though no chance to check this with reasonable efforts.

We will make a regular type of spare parts list as soon as we ever can.

The best I am able to create just right now for the NDR1402 is this.
