

FEATURES & BENEFITS

DOMETIC WH-6GEA 6 GALLON WATER HEATER

The choice
is yours!

The Dometic WH-6GEA is a market-leading water heater for mobile applications. The 10k BTU burner system generates hot water faster and longer for a true residential showering experience. An aluminum tank equals less weight, the convenient 110v AC power cord eliminates wire connectors, our reoriented tank sits lengthwise for floor plan flexibility, relocated components are easy to access, and it fits in the same cutout as a Suburban to facilitate upgrading to a Dometic. Our broad range of spare parts, accessories (conversion kit), replacement tanks and access doors make Dometic your best choice!

KEY BENEFITS

- Heats water fast, for longer time period
- Light weight replaceable aluminum tank
- Easy installation, low maintenance

FEATURE	BENEFIT	DOMETIC	Suburban
31 MINUTES OF HOT WATER ABOVE 100°F	Independent tests show Dometic water heaters deliver '3' times duration of 100°F water (1 gpm, 70°F inlet). Dometic water heaters produced 31 minutes of 100 °F plus water compared to Suburban's 10 minutes.	YES	NO
ALUMINUM TANK	Dometic's non-corrosive aluminum zinc alloy lined tank will not rust. Suburban produces a porcelain coated steel tank which as a metal is susceptible to rust and corrosion, and porcelain can crack during handling.	YES	NO
NO ANODE ROD	Dometic aluminum tanks do not require an anode rod like Suburban tanks. Save an estimated \$160 over 10-years (\$15.99 average rod cost). Suburban owners manual, "Under normal use, the anode rod will deteriorate and because of this, we recommend it be replaced yearly."	YES	NO
LIGHTEST WATER TANK IN ITS CLASS	Dometic's aluminum tank is 49% lighter at 19lbs. (6 gal) and 47% lighter at 24lbs. (10 gal). Suburban's porcelain-coated steel tanks weigh 37.4lbs. (6 gal) and 45.5-47lbs. (10/12 gal).	YES	NO
REPLACEABLE TANKS	Dometic tanks are easy to replace - 3 screws affix pan and 2 screws affix heating element to tank. Suburban's tank is welded to the control panel, the result is a non-replaceable tank.	YES	NO
FRONT MOUNTED HEATING ELEMENT	New front mounted heating element means easy access.	YES	NO
INCOLOY™ HEATING ELEMENT	Nickel-based high performance heating element from Special Metals Corporation, offers excellent corrosion resistance and high temperature strength to protect against damage to the heating element and P/T valve should you 'dry fire' the water heater.	YES	YES

Mobile living made easy.
