	Housing Assembly with Valve (RH 1/4 BSP) 8309-SP007		Leg assembly		Top housing ring 740-SP010
	Control Knob 8309-SP014				

Maintenance

Replacing a blocked jet:

- Your appliance is fitted with a specific size jet to regulate the correct amount of gas.
- Should the hole in the Jet become blocked, this may result in a small flame or no flame at all. Do not attempt to clean the Jet with a pin or other such device as this may damage the orifice, which could make the appliance unsafe.
- To replace the jet: Unscrew the 3 screws on the bottom housing cover (1) and remove cover.
- Remove the valve base plate (2) assembly by unscrewing the six self-tapping screws fixing it to the tripod housing (3) and subsequently remove the valve (4) from the housing simply by sliding it out.
- The jet (5) will now be accessible at the top of the valve.
- Unscrew the jet from the valve using a suitable spanner.
- Do not use pliers on the jet as this may damage the jet, making it unusable or impossible to remove. Screw the new jet into the valve. Do not over-tighten as this may damage the jet.
- Re-fit the valve and baseplate in the reverse order of assembly. When re-fitting the valve, ensure that the valve spindle aligns with slot in the tripod housing.
