

Cable Adapter Kit

Part # 302123 — for Mercruiser Sterndrive (all models) Inboards Throttle & Shift — 1975 & later

**NOTICE!**

Do not use on Mercury outboards! Use only with type 3300/33C cables

**NOTICE!**

Installer: these instruction contain important safety information and must be forwarded to the boat owner.

**NOTICE!**

Please read these instructions through carefully and entirely before installing or operating this control.

Installation

1. Remove the jam nut and both seals from the engine end of the cable (see figure 1). Discard the hub seal only.

Figure 1.

2. Slide the adapter onto the cable sleeve until a slot lines up with the cable hub groove.

**NOTE**

For shift connection on all models, use the center slot. See figure 3. For throttle connection on all models, use the slot nearest the anchor hole. See figure 4.

3. Replace the rod seal and jam nut on the cable. Thread the terminals onto the rod for shift and throttle. The cables are now ready to be installed on the engine.

NOTE

(For V-8 models only.) In order to get enough throttle travel in reverse when using CH5310P (MT-3 Single) or CH5300P (MT-3 Twin) control, the control hand lever must be placed in the vertical position at neutral detent and the cable terminal must be placed in the shorter hole on the carburetor arm.

NOTE

After the final adjustment, lock the clip in place by bending the extended tab of the clip over. Do not bend over the tab until the final adjustment has been made on the engine.

NOTE

Follow the manufacturer's instructions for complete installation adjustments.

Item No.	Description	No. Req'd
1	Adapter	2
2	Clip	2
3	Terminal	2
