Effective immediately, 6- and 10-gallon L.P. gas water heaters are undergoing a non-safety related change.

Change Description:

The changes simplify the available options and focus on the most desired features. The following features are standard on the updated models:

- Low profile doors (sold separately)
- Direct Spark Ignition (DSI) on all gas burners
- 120 VAC three-prong electrical plug (requires receptacle installation¹)
- Thermal blanket insulation (requires blocking installation¹)
- Stainless steel intake/exhaust grill mounted on the water heater pan (no longer mounted on the door)
- Male-threaded water connections and drain [0.5 in. (13 mm) NPT]
- Front-mounted electrical heating element on gas/electric models for improved service accessibility
- Spare parts delivered in retail cartons with product images

¹ Refer to the L.P. Gas Water Heater Installation and Operation Manual (3317866.000)

The following are discontinued:

- Pilot-lit gas burner
- Heat exchanger
- Control board 12 VDC wire harness with plug
- Brown carton SU model
- 10-gallon gas-only model

To determine which model to use when replacing an old Atwood, Dometic, or Suburban water heater, see “Water Heater Replacement Models” on page 3.

Cutout dimensions have changed for some 6-gallon models. There is no change for 10-gallon models.

Water Heater Cutout Specifications

This table shows the cutout specifications for some old Atwood and Dometic models versus the specifications for the new Dometic models.

Model	Cutout Width ¹	Cutout Height ¹	Cutout Depth
Old Atwood and Dometic Models (Refer to “Water Heater Replacement Models” on pages 3–4.)			
4–6 gal	12.6 in. (32 cm)	16.3 in. (41 cm)	17.6 in. (45 cm)
6 gal XT	12.6 in. (32 cm)	16.3 in. (41 cm)	18.5 in. (47 cm)
10 gal	16.3 in. (41 cm)	15.8 in. (40 cm)	20.6 in. (52 cm)
10 gal XT	16.3 in. (41 cm)	15.8 in. (40 cm)	21.8 in. (55 cm)

Model	Cutout Width ¹	Cutout Height ¹	Cutout Depth
New Dometic Models			
WH-6GA WH-6GEA	12.9 in. (33 cm)	12.9 in. (33 cm)	19.5 in. (50 cm)
WH-9GEA	12.9 in. (33 cm)	12.9 in. (33 cm)	24.0 in. (61 cm)
WH-10GEA WH-16GEA	16.3 in. (41 cm)	15.8 in. (40 cm)	20.6 in. (52 cm)
			25.1 in. (64 cm)

¹ The cutout width and height tolerance is $\pm 1/8$ in. (± 3.0 mm) on all models.

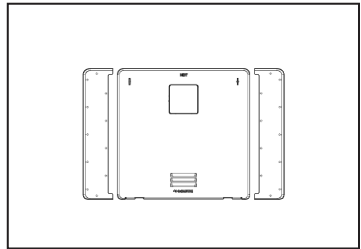

Action:

A new door is required for every water heater replacement; old doors do not fit the new models. The type of door depends on the width and height of the cutout for the old water heater. If the old cutout is larger than the new cutout, a door conversion kit with adapter plates is necessary to cover the gap and secure the water heater pan. Otherwise, the replacement will use a standard size door.

1. Determine which water heater will replace the old model. See "Water Heater Replacement Models" on page 3.
2. Compare the cutout width and height of the old water heater to the replacement model. See "Water Heater Cutout Specifications" on page 1.

Door/Conversion Kits

This table show the correct door kit to choose based on the model and cutout size of the old water heater.

Replaces Model	Item #	Legacy Item #	Description	
Legacy 6 gal ¹ Old cutout is larger than the new	4471011653	94946	SVC, 6GAL DOOR ASM #34 WHT	
	4471011654	94951	SVC, 6GAL DOOR ASM #44 BLK	

3. Select the appropriate door kit. See "Door/Conversion Kits" on page 2.

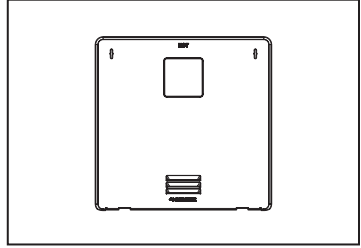

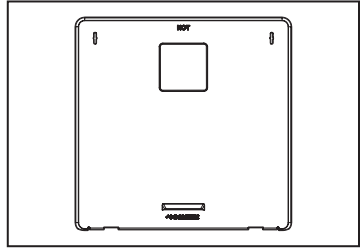

New Dometic 6-gallon water heaters require more depth than old Atwood and some old Dometic 6-gallon models; however, vehicle manufacturers often include additional depth, so the new water heater should fit. If a depth issue does occur, remodeling the RV may be required for installation.

Discontinued models with a pilot-lit burner should be replaced with a DSI model (for identification of pilot-lit burner models, see the table footnote in "Water Heater Replacement Models" on page 3). This change requires the installation of a wall switch connected to 12VDC power and wired to the new water heater's wiring harness.

A switch kit is required when replacing a Suburban 6-gallon gas/electric water heater that has a 120 VAC heating element operated by a switch accessed from the exterior of the vehicle. If the Suburban model is currently operated with a combo switch inside the vehicle, then no switch kit is required.

Item #	Legacy Item #	Description
