

 Dometic®

ultimate
outdoor coolers

Who We Are

Dometic Group is an innovator and trendsetter for people enjoying a comfortable, mobile lifestyle. We serve the market with a complete range of air conditioners, refrigerators, awnings, cookers, sanitation, portable coolers, lighting, mobile power equipment, windows, doors, minibars, safes and other products that make life away from home more comfortable.

Dometic designs and manufactures high-quality, innovative products for the RV, marine, hotel, automotive, agriculture, and trucking industries. Under the Dometic brand, we supply these industries with an extensive range of appliances and products.

While the strength of the Dometic brand was born in the invention of absorption cooling technology for products such as coolers and refrigerators, the brand has grown to include climate control products, awnings, sanitation systems, windows and doors – all of which stand on their own as quality representatives of a truly global brand.

Today the Dometic brand is associated with market leadership, comfort, and strength. People entrust their adventures to Dometic, the world leader in providing a comfortable mobile lifestyle.

All our products and services share a common philosophy: To find out what people really need and want, then use that insight to create thoughtfully designed innovations that provide a better user experience that makes their lives more comfortable when they are away from home.

Avalanche coolers are the ultimate outdoor coolers. They are rugged construction and built to last, dry-ice compatible, US FDA approved materials, non-toxic, UV resistant, easy to clean. The roto-molded design with thicker insulated walls with freezer style seal allow this cooler to store things cold for 7-10 days.

Unique Features

Available on the 35 and 55 models

Available the on 65 model

Molded in cup holders
to secure drinks

Polyurethane insulated. With
D-seal to lock in
heat or cold

Integrated stainless
steel hinges with
auto lock

All weather
heavy-duty
"T" latches
for durability

Rotating molded
handles for easy
transport

2" drain plug on
stainless steel
chain, stays where
you need it

Four reversible
skid/non-skid feet
for any surface

Stainless steel
locking plate
for maximum
security
Lock not included

Retractable handle
for easy mobility

Integrated stainless
steel hinges with
auto lock

Molded in cup holders
to secure drinks

Molded in
side handles
for easy lifting

2" drain plug on
stainless steel
chain, stays where
you need it

Heavy duty
wheels for
all terrain

AVAL65LW	62.1	15.5	23.4	17.6	22.5	18.9	12.8	17.3	28.7 lbs

Use and Care

1. Pre-cool your Avalanche Cooler

Use ice to chill your cooler a minimum of 4 hours or overnight for best performance. Avoid direct sunlight when preparing your cooler.

2. Pre-cool contents

When possible, chill or freeze your goods prior to packing them into your Avalanche cooler. The ice won't have to work as hard to get the contents cold and it will last longer.

3. Keep the cold water

As ice melts, cold water takes its place. Don't empty the cold water – it's almost as cold as the remaining ice, and works as an insulator. More water inside, means less space for cold robbing air to get in. Keep in mind that frequently opening the lid reduces the ice retention and melts the ice faster. Try to open the lid as little as possible. Close and latch the lid after accessing contents.

- Fill your Avalanche cooler with ice as much as possible. Ideally 2 times the amount being stored is recommended. More ice means less air, means longer ice retention.
- Block ice melts at a slower rate than small cubes of ice, so it maintains cold longer. However, cubed ice will chill the cooler faster. Benefits of both sizes of ice should be considered for optimum cooling and retention. Dry ice will quickly freeze/burn exposed skin. Always handle dry ice with gloves and allow adequate ventilation. Adding a small amount of dry ice will improve the retention of cubed ice.

Cleaning

Keeping your Avalanche cooler clean is important. Before and after each use, clean with dish soap and water. For more stubborn stains, use a mixture of water and bleach (6 parts water to 1 part bleach) and use a soft brush. To clean the threads of the drain plug and lid seal, use a soft toothbrush. Always dry inside and out before storing.

⚠ WARNING

SUFFOCATION AND CHILD ENTRAPMENT HAZARD. It is possible for small children to be trapped inside cooler. Adult supervision is required when cooler is in use around small children. Keep cooler out of children's reach when NOT in use. Failure to obey this warning could result in death or brain damage.

This warranty will be in effect for seven years from the date of purchase by Original Purchaser. It is suggested that the original purchaser retain a copy of the dated bill of sale as evidence of the date of purchase.

Purchaser can also go to www.dometic.com to register their Avalanche Cooler and activate the warranty.

This warranty covers the entire product including parts, all of which shall be free from defects in material and workmanship under normal use. This warranty does not cover conditions unrelated to the material and workmanship of the product. Such unrelated conditions include, but are not limited to: (a) damage not reported within the first 7 days of ownership; (b) failure to follow manufacturer's instructions for use and care (c) any accident to or misuse of any part of this product and any alteration by anyone other than an Authorized Dometic Service Center.
