Current production 6 in. (153 mm) clamp garnishes are undergoing a non-safety related design change.

Change Description:

To improve the installation of the clamp garnish for non-clamping purposes, the placement of the screw holes on the 6 in. (153 mm) clamp garnish have moved from the inside corners of the garnish to the outside corners. This change facilitates the attachment of the garnish to the ceiling, as opposed to the fan base.

Action:

The change only affects the 6 in. (153 mm) clamp garnish and any sizes cut from it. The new design uses 9010-81 garnish screws, like the standard garnish.

The new garnish style part number (PN) uses GDX instead of GX as a prefix to the size of the garnish. For example, the white 6 in. (153 mm) garnish PN GX6000-81S is now GDX6000-81S. The existing clamping garnish PN (GX) will remain available for roof thicknesses of 4 in. (102 mm) and below—cut from 4.5 in. (115 mm) or 1.5 in. (39 mm).

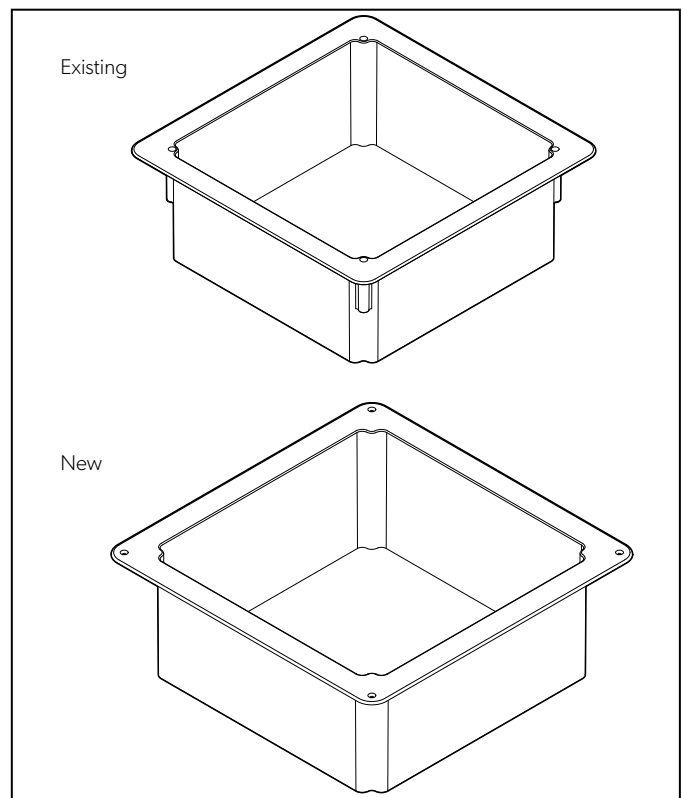

i The clamping feature is not recommended for roof thicknesses greater than 4 in. (102 mm), and will not be supported.

Beginning October 31, 2018, the clamp garnish PNs GX5000-81, GX5375-81, GX 5500-81, and GX6000-81, single (S) and bulk (B) packs will be obsolete and must be ordered using the GDX PN.

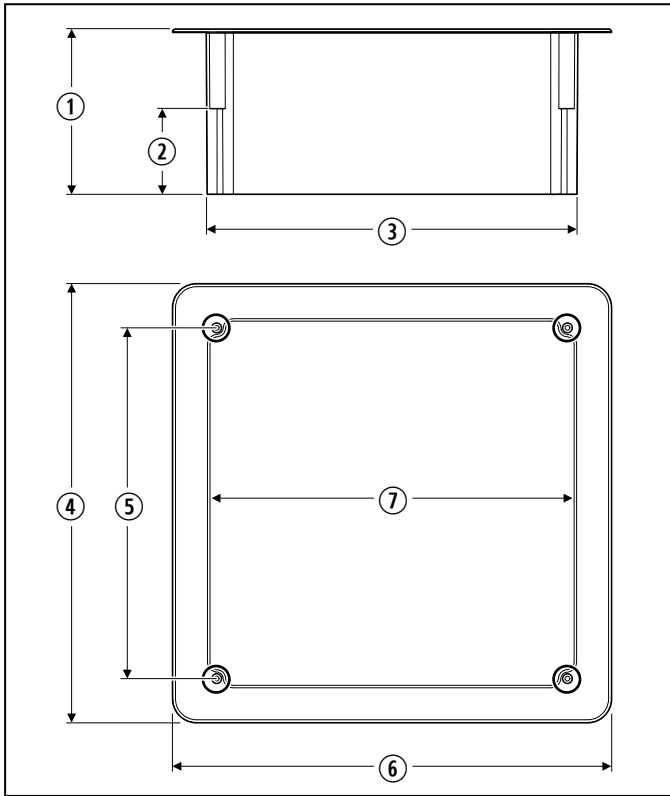

i All GX and GDX garnish sizes will work with clamp fans, dometic fans, and EZ-breeze fans. GDX garnishes are only available in white at this time. Requests for off-white or gray require approval.

The table shows a PN comparison for the single and bulk packs. Figures 1 and 2 show the changes to the garnish.
