Beginning April 20, 2020, Dometic will introduce a new 9200 Series Awning motor that accepts a common automotive fuse when a fuse replacement is necessary.

Change Description:

The new motor for all 9200 Series Awnings will:

- Be identified by the suffix .017 on the motor part number
- Not require the special fuse that was provided with the previous motor

The part number for the motor will change as follows:

Description	Part Number
Existing 9200 Series Awning Motor	3316605.001
New 9200 Series Awning Motor	3316605.017

Action:

Use a standard 15A automotive fuse when replacing the fuse in the new motor model.

The 15A fuse will provide sufficient protection.
