Effective immediately, Dometic has introduced a non-safety related change to the power awning hardware.

#### Change Description:

Changes include:

- All power awning hardware will now include a wiring harness that can connect to an awning LED light strip.
  - Previously, only the LED power awning hardware included the wiring harness.
  - The wiring harness can be tucked into the awning hardware or removed for awnings without an LED light strip.
- All power awning hardware part numbers will now end with an “L”.
  - Previously, power awning hardware part numbers ending with an “L” were for use only with awnings with the LED light strip.
  - If you order awnings without an LED light strip, add an “L” to the power awning hardware part number.
  - If you order awnings with an LED light strip, there is no change to the part number. You can continue to order as you have been.

	Power Awning Hardware Part Number	
	Existing	New
For awnings with an LED light strip	Example 8952002.400UL <sup>1</sup>	Example 8952002.400UL <sup>1</sup>
For awnings without an LED light strip	Example 8952002.400U	Example 8952002.400UL

<sup>1</sup>The same part number is ordered.

#### Action:

Add an “L” to the end of the power awning hardware’s part number if ordering awnings without an LED light strip.
