

COMPRESSOR ISOLATION KIT FOR MODEL 590, 591 AND 595 SERIES AIR CONDITIONERS

AIR CONDITIONER
BULLETIN A23/7A
MAY 1997

The Dometic Corporation, as part of our continuing effort to provide quiet air conditioner operation, has designed a Compressor Isolation Kit that will reduce the sound caused by air conditioner compressor vibration that may be transmitted into and through ceiling structures. This Kit is designed to remove most of this vibration by isolating the compressor base plate from the base pan.

Compressor Isolation Kit Number 3108705.066 can be installed on the above air conditioners only with serial numbers 709 XXXXX and lower. Air conditioners with serial numbers 710XXXXX and above have been manufactured with these enhancements. This Kit can be ordered directly from Dometic by calling our Factory Dealer Direct Office at 800-366-3842 or call our Technical Service Office at 800-216-5115.
