Effective immediately, L.P. Gas Water Heaters models WH-6GA, WH-6GEA, and WH-9GEA are undergoing a non-safety related change.

Change Description:

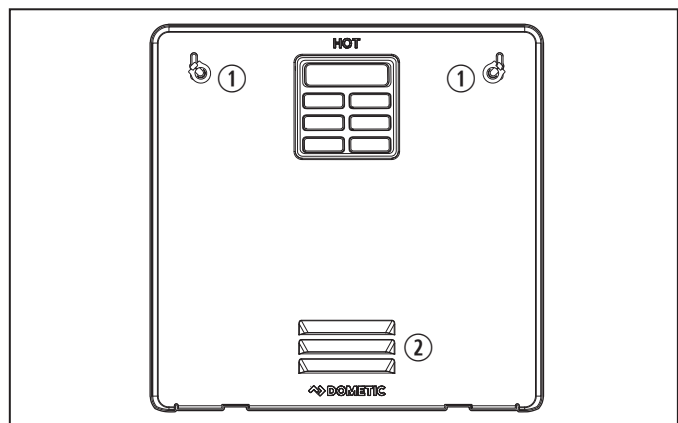

As part of an overall water heater redesign, latches have been added to the top corners to more securely hold the door and provide consistent spacing from the wall. The center latch has been removed.

Louvers have been added to improve air flow into the burner.

1 Current Door

① Center Latch

2 New Door

① Top Latch

② Louvers

Action:

The current doors cannot be installed on the new water heater design.

As doors are ordered separately, care should be taken to avoid building up excess stock of the current doors.

A service kit will be available to retrofit water heaters of the old design with the hardware to install a new door.
